¿Qué encabezado HTTP indica el formato en que queremos recibir información?

El encabezado `Accept`. Al configurar `application/yang-data+json`, solicitamos una respuesta JSON. Al utilizar `application/yang-data+xml`, solicitamos XML. El encabezado `Content-Type`, por su parte, identifica el formato del cuerpo que enviamos al servidor.

¿Qué código HTTP devuelve el router al eliminar exitosamente la interfaz?

204 No Content, lo que significa que la eliminación se realizó correctamente y que el servidor no necesita devolver contenido adicional.

¿Cuál es la diferencia entre GET, POST, PUT, PATCH y DELETE?
Todos son metodos distintos que se utilizan para varias funciones, tanto para consultar, crear, actualizar, reemplasar, y eliminar recursos de una direccion web

¿Qué significan los códigos HTTP?

Código	Significado
`200 OK`	Solicitud exitosa con respuesta.
`201 Created`	Recurso creado exitosamente.
`204 No Content`	Operación exitosa sin cuerpo de respuesta.
`400 Bad Request`	Solicitud inválida o mal formada.
`401 Unauthorized`	Falta autenticación válida.
`403 Forbidden`	La operación no está autorizada.
`404 Not Found`	Recurso o ruta inexistente.
`415 Unsupported Media Type`	Formato de contenido no admitido.
